**SYNTHETIC
MOTOR ENGINE OIL**

FULLY SYNTHETIC ENGINE OIL

0W30 SM C2

Euro Atlantic fully synthetic engine oil 0W30 C2 is a extreme performance engine oil with high additives content specially formulated for modern vehicle engines. It can be used in conditions of use such as city, road, highway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements and european standards.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

- Very high lubricity to reduce friction
- Excellent oxidation stability
- Very good anti-corrosion, anti-rust, anti-foam properties

Specifications

ACEA C2 , FORD WSS-M2C953-B1, BMW Longlife-04,
MB-Approval 229.31/229.51, Approbation PSA B71 2290

0W30 SM C3

Euro Atlantic fully synthetic engine oil 0W30 C3 is a extreme performance engine oil with high additives content specially formulated for modern vehicle engines. It can be used in conditions of use such as city, road, highway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements and european standards.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

- Good anti-wear properties resulting in perfect engine protection
- Excellent dispersive and detergent properties

Specifications

VW 504.00/VW 507.00, Porsche C30,
MB-Approval 229.51, BMW Longlife-04

**MULTIGRADE
ENGINE OIL**

GASOLINE-DIESEL MULTIGRADE ENGINE OIL

5W30 SM/CF C2

Euro Atlantic fully synthetic multigrade engine oil 5W30 C2 is a premium quality engine oil with high additives content specially formulated for modern vehicle engines. It can be used in conditions of use such as city, road, highway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements and european standards.

Specifications

ACEA C2, Porsche C30, BMW Longlife-04,
Approval PSA B71 2290, Renault RN 0700 / RN 0710

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

5W30 SM/CF C4

Euro Atlantic fully synthetic multigrade engine oil 5W30 C4 is a premium quality engine oil with high additives content specially formulated for modern vehicle engines. It can be used in conditions of use such as city, road, highway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements and european standards.

Specifications

ACEA C4, FORD M2 C917-A, Renault RN 0720
MB-Approval 226.51

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

10W40 SL/CF

Euro Atlantic 10W40 Engine Oil is a high performance oil, high-end range, formulated for use in all types of gasoline or diesel engines. It can be used in conditions of use type city, road, motorway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements. It is particularly recommended for passenger cars and light commercial vehicles

Specifications

MB 229.3, BMW66-04, FIAT 9.55535-D2/G2,
VW 500.00/505.00, RN 0700

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

15W40 SL/CF

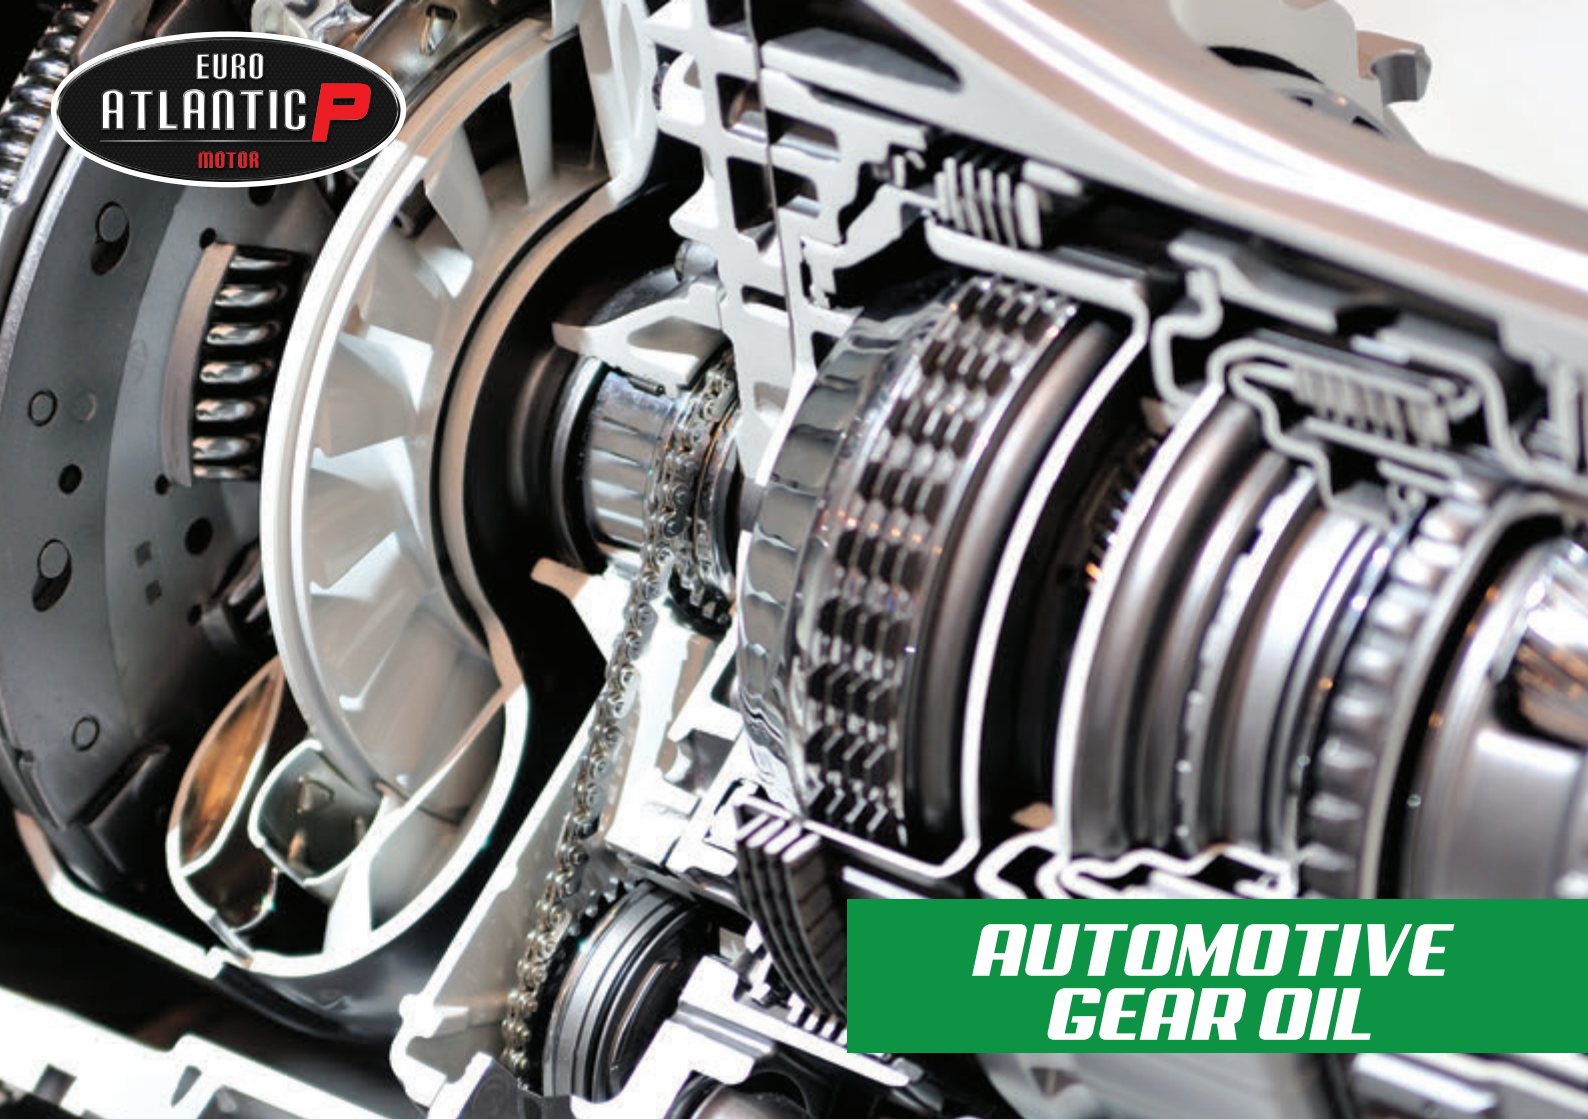

Euro Atlantic 15W40 Engine Oil is a high performance oil, high-end range, formulated for use in all types of gasoline or diesel engines. It can be used in conditions of use type city, road, motorway and in extreme conditions, in all seasons. It is specially formulated to meet the latest performance requirements. It is particularly recommended for passenger cars and light commercial vehicles

Specifications

MB p229.3, VW 502.00/505.00

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

***AUTOMOTIVE
GEAR OIL***

AUTOMOTIVE GEAR OIL

75W80

Euro Atlantic 75W80 Gear Oil is a premium quality lubricant heavy duty multipurpose lubricant specially manufactured in order to adapt to the most stringent requirements of manufacturers demanding high extreme pressures and anti-wear levels, high temperatures and cleanness of transmission.

Specifications

GL-5, MAN 341 Typ E4, Volvo Transmission oil 97307

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

75W90

Euro Atlantic 75W90 Gear oil is premium grade shear stable high VI anti wear gear oils specially formulated for heavy-duty applications. This Gear oil is formulated on the basis of highly ageing resistance solvates containing additives that increase the aging resistance. This Gear Oil is suitable for industrial hydraulic equipment subject to wide variation in temperatures.

Specifications

CEC: L-45-A-99, GL-5, MACK T0-A PLUS

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

80W90

Euro Atlantic 80W90 Gear Oil is a premium quality lubricant heavy duty multipurpose lubricant specially manufactured in order to adapt to the most stringent requirements of manufacturers demanding high extreme pressures and anti-wear levels, high temperatures and cleanness of transmission. Suitable for mechanical transmission system working in severe conditions. Suitable for lubricating mechanical gear boxes and reduction drives in lorries, trucks, agricultural and construction machinery

Specifications

MIL-L-2105D, GL-5, Mack GO-J

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

***AUTOMATIC
TRANSMISSION FLUID***

AUTOMATIC TRANSMISSION FLUID - ATF

DEXRON III

Euro Atlantic ATF is a superior quality fluid, which withstands high pressures, it allows a better stability thanks to its viscosity index and comfort of driving.

It is particularly recommended for all types of automatic machines, torque converters, transmission systems, power steering and hydraulic systems.

Available in all types of grade Type A, Dexron II, Dexron III, Dexron IV

- Provides reliable protection against wear, sludge, gums and corrosion
- Offers comfort and improvement in shifting
- Provides excellent viscosity behavior with respect to temperature, especially when cold
- Excellent resistance to oxidation

Specifications

VOITH 55.6335, ZF TE-ML-05L, 09, 21L

ALLISON C-4

Available in different packaging sizes

1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

HYDRAULIC OIL

HYDRAULIC OIL

ISO VG-68

Euro Atlantic Hydraulic Oil is a premium quality heavy duty lubricant formulated with highly refined base stocks and well balanced package of advanced anti corrosion, anti oxidant and anti foam additives. The product is available in different ISO VG viscosity grades to suit the ambient operating temperatures requirements. It is formulated for use in high pressure hydraulic systems, in all mobile and stationary equipments, operating under severe working conditions. It is also used for circulating systems, compressor, pump, bearing and gear lubrication. Available in all types of grades ISO 32, ISO 46, ISO 68 and ISO 100

- Reduces and maintains fleet operating costs
- Controls bore polish and reduces oil consumption
- Improved soot discrepancy.

Specifications

ISO 11158 HM, Denison HF-1, HF-2, DIN 51524/2 HLP,
VDMA 24318, Eaton (Vickers) M-2950-S, I-286-S

Available in different packaging sizes

1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

COOLANT

RADIATOR COOLANT

COOLANT 20%

Euro Atlantic Anti freeze Coolant is a premium quality concentrated ethylene glycol based engine coolant/anti freeze. It is formulated with latest anti-corrosion inhibitors and high quality ethylene glycol which gives long time protection and suited for year round use in cars, light and heavy duty trucks, specially made for cooling system components.

Product specification 20% concentration ready to use coolant.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

COOLANT 30% G-12

Euro Atlantic Anti freeze Coolant is a premium quality concentrated ethylene glycol based engine coolant/anti freeze. It is formulated with latest anti-corrosion inhibitors and high quality ethylene glycol which gives long time protection and suited for year round use in cars, light and heavy duty trucks, specially made for cooling system components.

Product specification 30% G-12 concentration ready to use coolant.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

COOLANT 30%

Euro Atlantic Anti freeze Coolant is a premium quality concentrated ethylene glycol based engine coolant/anti freeze. It is formulated with latest anti-corrosion inhibitors and high quality ethylene glycol which gives long time protection and suited for year round use in cars, light and heavy duty trucks, specially made for cooling system components.

Product specification 30% concentration ready to use coolant.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

COOLANT 50%

Euro Atlantic Anti freeze Coolant is a premium quality concentrated ethylene glycol based engine coolant/anti freeze. It is formulated with latest anti-corrosion inhibitors and high quality ethylene glycol which gives long time protection and suited for year round use in cars, light and heavy duty trucks, specially made for cooling system components.

Product specification 50% concentration ready to use coolant.

Available in different packaging sizes
1L, 4L, 5L, 20L and 208L. Other sizes can be made upon request.

BRAKE FLUID

BRAKE FLUID

DOT-4

Euro Atlantic Brake Fluid DOT-4 is a premium polyglycol synthetic brake fluid. It has high temperature resistance and low moisture absorption providing superior boiling point and high vapour lock temperature throughout its service life.

This Brake Fluid is generally used in disc and drums brake systems as well as clutch fluid meeting above standards.

- Long volatility and low pour point ensure performance in normal temperature range.
- Provides protection against rust and corrosion.
- Compatible with rubber seals.
- Miscible with other approved glycol ether.
- Good breaking response.
- Reduces chances of vapor lock.

Specifications

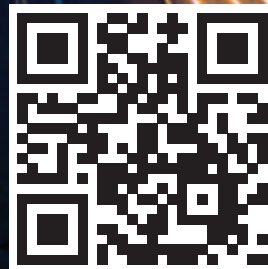

DOT-4, ISO 4925, V V-B-680B, JIS K 2233 Class 4,
HN 1796

Available in different packaging sizes

250ml, 500ml, 1L, and 208L. Other sizes can be made upon request.
